Dear Dr Waddell

MP 5.4/109

I enclose a copy of our referee's comments on this manuscript, with the copy of the manuscript on which the referee has made his pencil annotations. As you will see he is asking for some fairly extensive rewriting of your paper before it becomes acceptable for publication. I look forward to hearing from you further in due course.

Yours sincerely

Ian M Mills

U.K.

Amsterdam, 10 December, 1979

Dear Dr. Gerratt and Dr. Waddell,

I was pleased to learn from Professor McDowell that you are willing to write an article on 'New Developments in the Barnett-Coulson Method for Calculating Molecular Integrals' to appear as an issue of our journal PHYSICS REPORTS.

In connection with this, I should very much appreciate receiving your confirmation on the following points:

1. That the report will not exceed 70 printed pages (approximately 50.000 words, figures and tables included).
  2. That you agree with the general financial arrangement, viz. a remuneration of \$10.00 per printed page of about 700 words, to a maximum of \$500.00 and ten free reprints of your paper. Besides this, you are allowed to order reprints of your paper at a reduced price compared to the retail price of the issue.
  3. That you will submit your manuscript to Professor McDowell by <sup>x</sup> in its final form. This means that when you receive proofs you will only correct printers errors. The reason for this is that corrections are very costly and should, therefore, be avoided as much as possible. Any new development can be added as a "Note added in Proof".
- That you will supply original figures (or high quality glossy prints), ready for reproduction by the printers.
5. That if the manuscript has not been submitted to the Editor one year after the deadline date, this 'Letter of Agreement' shall be void, and the project will be dropped, unless contrary instructions are received from Professor McDowell.

If the deadline mentioned in item 3 is unattainable, could you please mention the realistic date. Please return the xerox copy of this letter together with your signature and comments.

Looking forward to a pleasant cooperation, I remain,

Yours sincerely,

\*Ms with referees -

*William Montgomery*

Dr. William Montgomery  
Physics Editor

I agree with the points mentioned above.

Dear Dr. Gerrat and Dr. Waddell,

Re: Physics Reports

I wish to acknowledge, with thanks, receipt of the signed 'Letter of Agreement' with respect to your article 'New Developments in the Barnett-Coulson Method for Calculating Molecular Integrals', which will appear as an issue of Physics Reports.

With kind regards,

Yours sincerely,

Edith M. Habich  
Secretary to Dr. W. Montgomery  
Physics Editor
